JUNIOR WEB DEVELOPER

IS undergraduate with continuous hands-on experience supporting university and government offices IT operations through capstone projects and technical support roles. Skilled in troubleshooting hardware, software, and network issues, performing system maintenance, drafting technical documentations, developing web-based solutions, and utilizing AI to improve productivity. Eager to apply strong technical, analytical, and customer service skills across a wide range of IT roles.

EDUCATION

Kolehiyo ng Lungsod ng Dasmariñas BS in Information Systems Relevant Coursework: Foundational Information Technology Concepts, System Analysis and Design	City of Dasmariñas, CA 2023 - Current
Dasmariñas East Integrated High School Computer Systems Servicing, ICT Strand Relevant Coursework: Networking Foundation, Computer troubleshooting	City of Dasmariñas, CA 2021 - 2023

EXPERIENCES

Web MIS with 2D Grave Mapping — Thesis - Led the development team in designing the system architecture, optimizing database queries, and enforcing clean code and data-management standards. - Built a web-based solution that consolidated 21,000 fragmented burial records for Panteon de Dasmariñas. - Integrated manually plotted burial locations from QGIS into the web system for interactive 2D mapping.	Feb, 2026 - Nov, 2026
PawPal Dog Feeder — Arduino - Engineered an automated dog feeder using a weight sensor, LED module, and spinning motor. - Contributed to hardware design and tested the system to verify output accuracy	Nov, 2025 - Dec, 2025
Pet Lab — Side Project - Built a web-based consultation platform connecting pet owners with certified veterinary professionals. - Implemented real-time chat and video conferencing using Laravel Reverb WebSockets.	Aug, 2025 - Nov, 2025
PHP Template Library — Side Project - Created a reusable, code-based template tailored to personal PHP development workflows. - Authored documentation to streamline review of core PHP concepts.	May, 2025
Norte Cafe — 2nd Year Final Project - Streamlined the online ordering process for Norte Cafe, a local cafe business, through a custom web solution. - Led the development team and implemented a code architecture modeled on Laravel conventions.	Feb, 2025 - May, 2025
